FROM SALES TO ENGINEERING

Story of an ENGINEER

TITANS

☑ Sales to Core Engineering - a leap that most people wish to take but can't.

“It's never too late to be what you want to be.”

💧 Meet Waman, a graduate in mechanical engineering, who got placed in a sales role and later figured out it was not the right field for him.

He was in a dilemma, where on one side he had a stable income but no satisfaction in his work, and on the other side, he had his mechanical engineering passion with no guarantee of success.

⚡ **What did he do?**

He choose to take the leap of faith and enrolled himself in an online course to upskill himself. Fast forward to today, he has gotten more than 3 interview calls from amazing companies, and he is cruising on his road to a successful career in core engineering.

Thank you
